

PRODUCT LIST

RD906

6 Speed Rear wheel drive transmission

RD905

5 Speed Rear wheel drive transmission

Adapt the RD90 to virtually any engine/car combination without need for new patterns or extensive redesign.

RD236

6 Speed Rear wheel drive transmission

The R236 is specifically designed for high engine torque rear wheel drive drifting, circuit and endurance racing, typically 600 to 1000 Nm, can be used with or without paddle shift and oil cooling options.

R176

6 Speed Rear wheel drive transmission

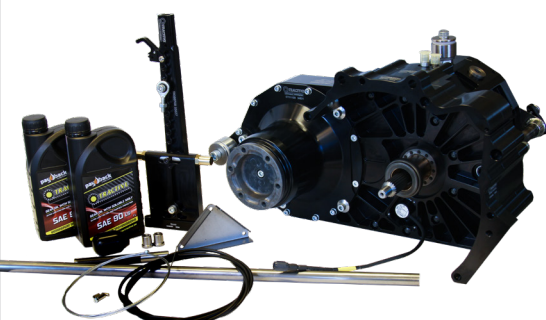

The RD176 is specifically designed for mid to high engine torque rear wheel drive circuit and endurance racing, typically 250 to 600 Nm, can be used with or without paddle shift and oil cooling options.

RDT175

5 Speed Rear wheel drive transmission

The Tractive RDT175 combines proven technology from the RD90 gearboxes with a slimmer and simplified housing design.

SD906

6 Speed Front wheel drive transmission

SD905

5 Speed Front wheel drive transmission

Different versions of the SD90 gearbox fit very different cars. Many competitive FWD cars now rely on the superior reliability of the SD90 gearbox.
